

/ APPLICATIONS

'Bodyflow electrotherapy devices have a specific frequency that targets the 'smooth muscle' found in arteries, veins & lymphatic vessels.

Clinical trials and case studies have shown Bodyflow treatments to be a safe and effective adjunct to recovery. Around the world Bodyflow has become a 'gold standard' treatment modality for many top sporting teams and organisations.

Bodyflow devices are now being used to assist in the management of the following conditions, all of which benefit from increased circulation and/or lymphatic drainage:

- Post-operative swelling
- Lymphoedema (Chronic swelling)
- Sports Injuries
- Post exercise recovery
- Wound healing
- DVT prevention

/ ABOUT BODYFLOW®

Bodyflow devices are included in the Australian Register of Therapeutic Goods (ARTG) with the TGA, CE Marked and FDA cleared.

bodyflow®

Bodyflow® Therapy : Used by Lymphoedema Practitioners, Physiotherapists, Podiatrists and Professional Sporting Organisations around the world to aid in patient & athlete tissue recovery.

/ AUTHORISED BODYFLOW CLINICS

After evaluating Bodyflow Therapy by conducting internal case studies within their own clinical environment, many leading practitioners and sports trainers from around the world have now incorporated Bodyflow Therapy as an adjunct Therapy for both their respective patients and professional athletes.

"I have been using the Bodyflow system in my clinic in Brisbane for the last 3 years. Myself and all of my staff have found it a useful treatment tool for any sort of sub-acute or chronic oedema. Recovery times for these patients have dramatically improved. It has opened up a whole new demographic of patient to our clinic and has also given us a real point of difference to other health providers in the area. This has resulted in an increase in patient numbers and there has also been increased "passive" revenue due to the number of patients who are renting the portable units for home use on a weekly basis."

Roger McIntosh / Principal Physiotherapist /
North West Physiotherapy / QLD Australia

/ PROFESSIONAL SPORT

Bodyflow Therapy is now used by professional sports teams, athletes and institutions around the world such as EIS, EPL, NBA, NFL, Pro Cycling, AFL, NRL & Olympic nations, just to mention a few.

"Having used Bodyflow extensively in the past and being aware of its benefits for lymphatic drainage for sports performance recovery and injury recovery I was delighted to continue this relationship with Perform at St George's Park. With the number of professional footballers attending St George's Park for periods of intensive rehabilitation Bodyflow is a key part of our management of inflammation in injury and recovery post sessions. While the players are residential for their rehabilitation it allows us to use the system a number of times a day to optimise the benefits it may have."

Steve Kemp / Elite Football Physiotherapist /
Perform at St Georges Park

/ PROFESSIONAL RECOVERY

"I've been using Bodyflow for the past year to help me overcome some injuries and the results in terms of reducing swelling have been fantastic. I also find it very useful after high intensity sessions to help me recover and train or race at my peak. The treatments are simple and really do make my legs 'feel lighter' . . . Thanks Bodyflow!"

Felicity Abram / Professional Triathlete
